

Freeway Golf Club

CLIENT:	Freeway Golf Club
LOCATION:	Balwyn North, VIC
PRODUCT:	CoverLawn
GRASS TYPE:	Santa Ana Couch
APPLICATION:	Club House Area
SPORT:	Golf
DATE:	October 2019

KEY CHALLENGES

The outside catering area is adjacent to the cart-path, frequented by foot traffic and golf carts -Both contributed to heavy wear areas, with poor turf conditions prevailing. This area is also the main traffic area heading to teeing areas and rest area between each 9 holes and waiting area for cross over to 1st and 10th tee boxes.

SOLUTION

New turf was laid, prior to installing CoverLawn. CoverLawn protects the natural turf, alleviating bare patches, creating a safe & stable natural grass area. Growing through the open backing, designed for drainage and root growth. CoverLawn is maintained with the same practices used on natural turf. CoverLawn provides the best of both worlds' - Natural grass combined with synthetics.

“The turf in the transition area between the 1st and 10th tee was difficult to maintain given the high traffic of both our players and golf carts. CoverLawn has allowed us to now maintain this area to the highest standards our member's and guests expect on a year-round basis.”
