

Centennial Park

CLIENT:	Centennial Parklands
LOCATION:	Sydney NSW
PRODUCT:	CoverLawn
GRASS TYPE:	Couch
APPLICATION:	Open Space
DATE:	February 2019

KEY CHALLENGES

Centennial Parklands is one of Sydney's most used public spaces. The playground and gardens are frequently visited year-round by families. The grassed area were parents wait for the children to explore the gardens and play equipment, had poor turf conditions due to overuse and shade from nearby trees. The natural turf was hard to grow and at times became unusable. A main entrance areas was also affected by heavy foot traffic.

SOLUTION

CoverLawn was installed as a long-term solution - on top of existing turf and the worn areas re-seeded after installation. CoverLawn protects the natural turf, alleviating bare patches, creating a safe & stable natural grass area. Growing through the open backing, designed for drainage and root growth. CoverLawn is maintained with the same practices used on natural turf. CoverLawn provides the best of both worlds' - Natural grass combined with synthetics.

"The trial of CoverLawn in the Children's Garden has succeeded. From an almost bare covering of turf, there is now 100% coverage. We have monitored these areas through a full season and are extremely happy with CoverLawn."
